

# Foetal Bovine Serum

## ◆ Extensive Choice of Origin including:

- ◆ USDA Approved
- ◆ EU Approved
- ◆ EDQM Certified

## ◆ Affordable, Quality Assured Foetal Bovine Serum

## ◆ Sterile filtered by 3 x 0.1µm filters conforming to FDA regulation 211.72

## ◆ Manufactured in fully validated facilities under strict GMP

## ◆ Complete Traceability to Serum Source with Full Quality Documentation

## ◆ Direct delivery from international supply partner to customer

Bovogen Biologicals is an Australian manufacturer and supplier of a variety of animal derived sera and proteins to the global life sciences community.

In partnership with other world class suppliers of foetal bovine serum (FBS), Bovogen Biologicals has recognized the need for an affordable, high quality source of FBS, as an alternative to their premium Australian origin serum which is manufactured 'in-house'.

We have therefore expanded our product range by sourcing FBS from countries with minimal risk of contamination by animal disease causing agents. As part of the stringent quality system, ante- and post mortem inspections of all animals are undertaken by government veterinary officials. In addition, testing for specific diseases such as Bovine Spongiform Encephalopathy (BSE or Mad Cow Disease) is also conducted on FBS from some origins.

# Foetal Bovine Serum

Bovogen Biologicals' international FBS supply partners operate under strict GMP in fully validated, purpose built facilities outside of Australia. All serum is fully traceable from the source to the bottle and supported with full quality documentation.

Bovogen Biologicals' FBS of non Australian origin is produced outside Australia in facilities that are either approved by the United States Department of Agriculture (USDA) and / or the European Union (EU).

In addition, most FBS offered by Bovogen Biologicals is certified by the European Directorate of Quality Medicines (EDQM) with a Certificate of Suitability.

This certification meets the criteria described in the current version of the monograph Products with Risk of Transmitting Agents of Animal Spongiform Encephalopathies No. 1483 of the European Pharmacopoeia.

In collaboration with our international industry partners, our commitment to quality enables Bovogen Biologicals to provide the global life sciences industry with an affordable alternative to Australian FBS that is of the highest possible standard.

Bovogen Biologicals takes pride in surpassing customer expectations for product quality, delivery and service; and we enjoy being an industry partner for our customers.

## ORDERING INFORMATION

Cat No.	Size	Origin
SFBS	500ml	France
SFBS	500ml	USA
SFBS	500ml	New Zealand
SFBS	500ml	Australia
